

**AMENDMENT TO THE SPECIFICATION**

Please replace paragraph [0019] with the following amended paragraph:

[0019] In one embodiment, instead of mounting a sensor on or near the wellhead, a coil of wire or Hall effect sensor is embedded or molded into a wiper rubber. [[A]] **As shown in Figure 3, a** wiper rubber **59** is placed around the tubing or rod **62** being run into the well so as to wipe off any excess fluids from the tubing or rod. The signal detection is thus independent of the wellhead while providing the same results as the embodiments disclosed above.
